THE BIG PICTURE

Stop running your station on paper and guesswork

Registers, notebooks and spreadsheets make it hard to know what you sold, what's in the tank and what you actually earned. FuelBotics puts it all in one place, updated as your team works.

Fuel goes missing

Gaps between deliveries, sales and tank dips go unnoticed for weeks.

Month end takes days

Adding up registers by hand to find out if you made money.

No view from a distance

Owners have to call the station to know today's sales.

TASK	PAPER OR SPREADSHEETS	FUELBOTICS
Book stock	✗ Worked out by hand	✓ Updated with every sale and delivery
Fuel losses	✗ Found weeks later, if at all	✓ Flagged at each tank dip, with an alert
Several stations	✗ Calls and files sent around	✓ Every site side by side, from anywhere
Accountability	✗ No record of who changed what	✓ Changes recorded, with per-user permissions
Month end	✗ Hours of adding up	✓ Monthly profit & loss ready to download

Everything included in every plan

Meter readings & pump tests

Fuel & lubricant sales

Tank dips & book stock

Stock loss & gain

Margin & price impact

Stock & sales alerts

Customer & supplier accounts

Expenses & cash flow

Staff, attendance & payroll

Monthly profit & loss

Multi-station reports

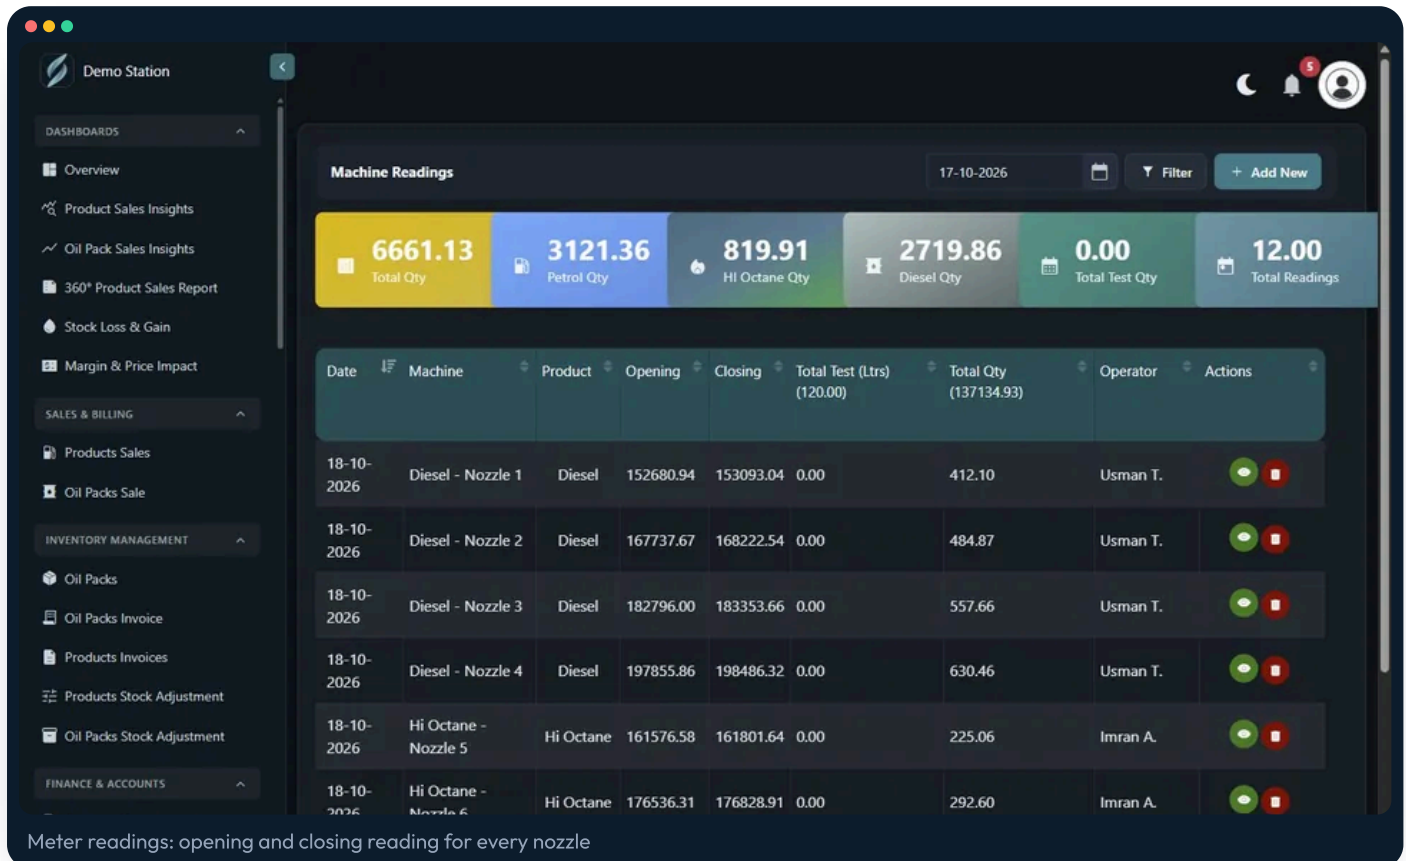

User permissions

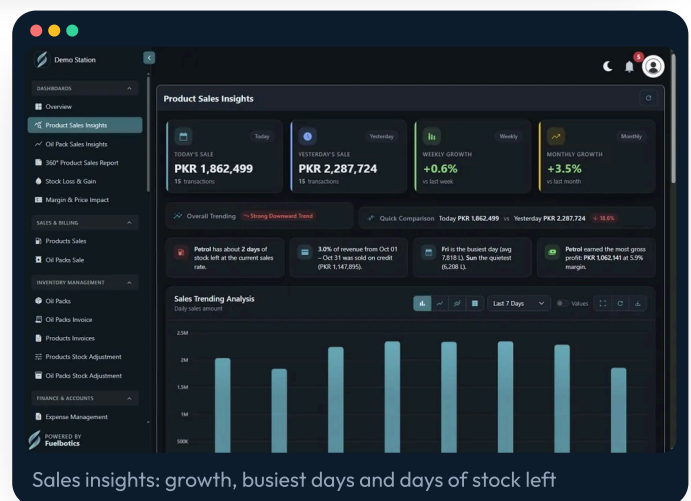

01 FORECOURT

Sales and meter readings in minutes

Your team records each shift in the browser. Litres and totals are worked out for you, and owners see the results straight away.

- ✓ **Meter readings** for every nozzle and shift, with bulk entry for all pumps at once
- ✓ **Pump tests** recorded separately, so test litres never count as sales
- ✓ **Fuel sales** by category, such as road sales, agencies or fleets, for cash or on credit
- ✓ **Lubricants and oil packs** with batch cost and expiry
- ✓ **Daily targets** per product, with progress on the dashboard

Sales insights compare today with yesterday, show weekly and monthly growth, your busiest days, credit share and how many days of stock each product has left.

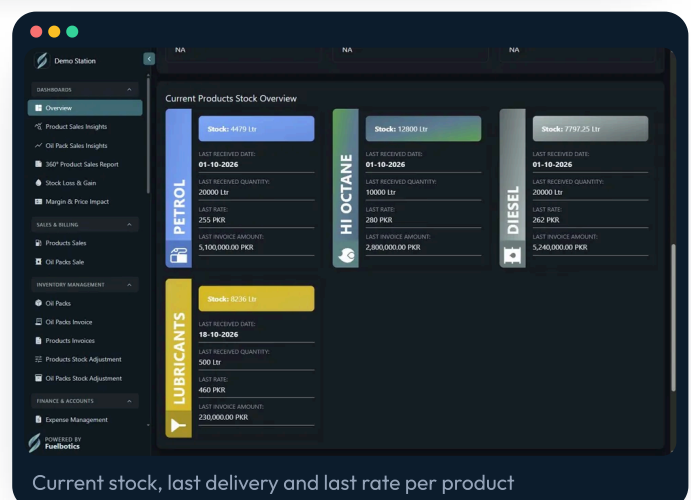

02 STOCK CONTROL

Know what's in every tank, and what went missing

Book stock moves with every delivery and sale. Each tank dip is compared with it, so losses show up at the next dip, not at month end.

- ✓ **Product invoices** from suppliers update stock and purchase cost
- ✓ **Tank dips** recorded and compared with book stock
- ✓ **Stock adjustments** with a reason and attachments
- ✓ **Litres and value** lost or gained between each pair of dips
- ✓ **Likely mistyped dips** detected and left out of totals
- ✓ **Export** to CSV, Excel or PDF

03 PROFIT PROTECTION

See your real margin, and hear about problems first

Margin per litre is worked out at weighted average cost, and every price change shows what it did to fuel already in your tanks.

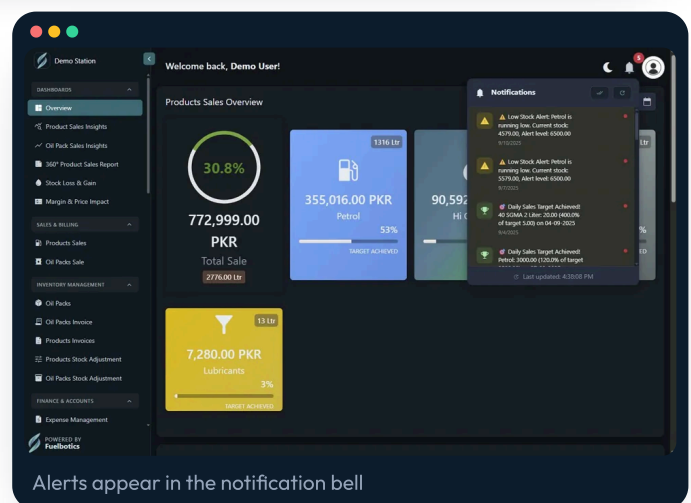

Margin & price impact

- ✓ Gross margin and margin per litre, by product and date range
- ✓ One-off gain or loss from each price change on stock in the tank
- ✓ Warnings when a product sells below its average cost

Alerts

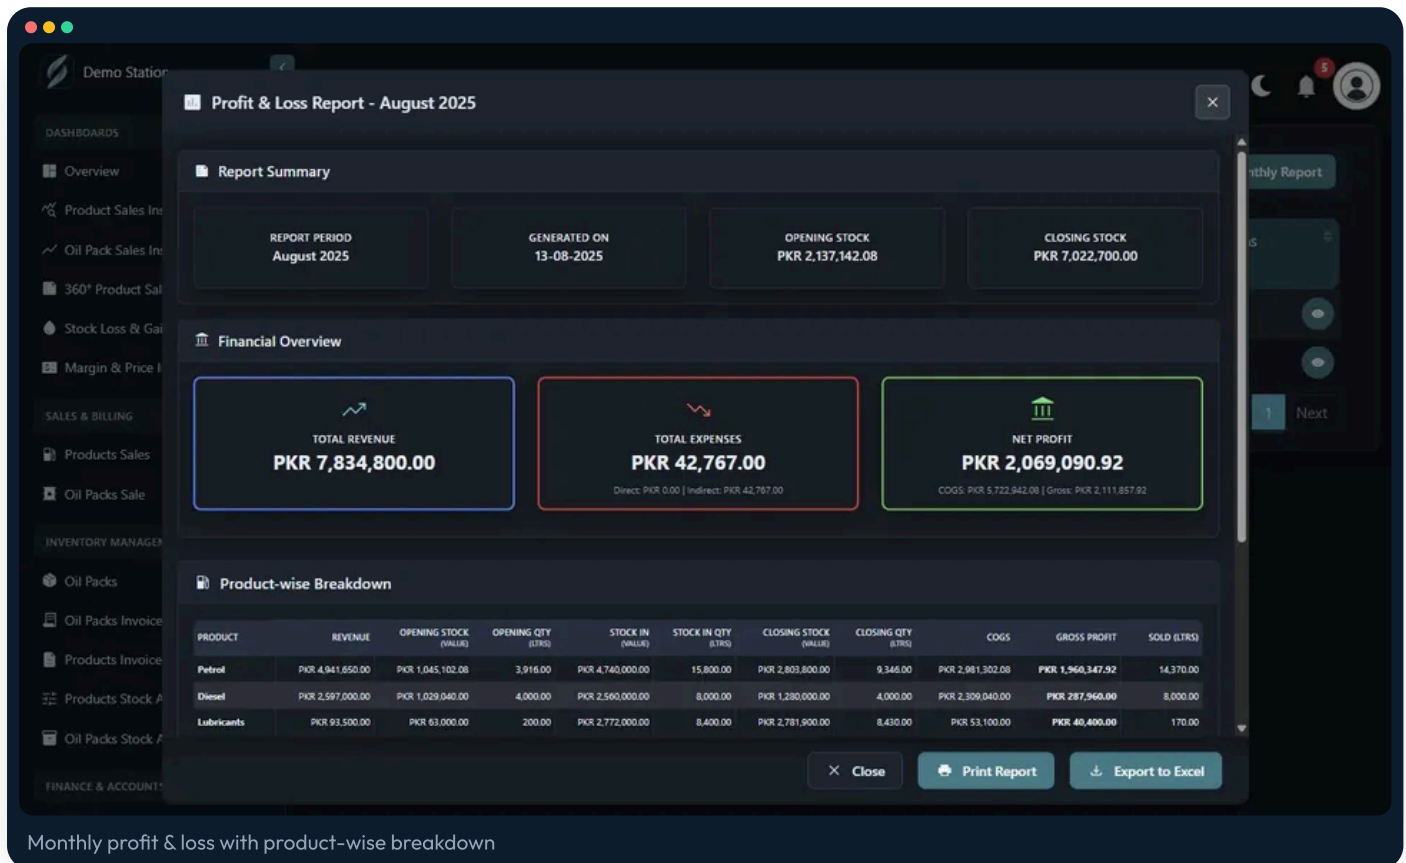

- ✓ Low stock when a tank drops below the level you set
- ✓ Daily sales targets reached
- ✓ Unusual tank dips: more than 1% of book stock and 50 litres

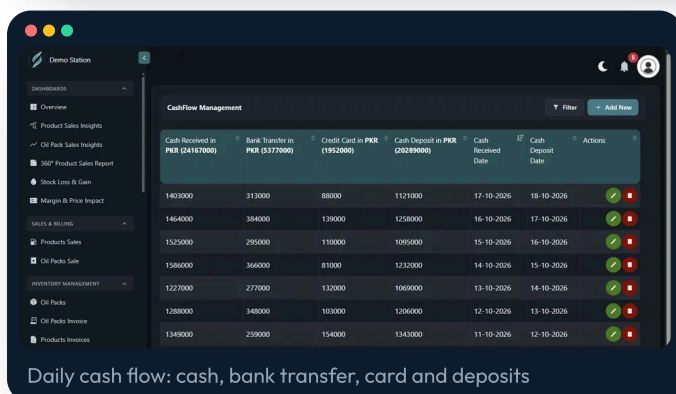

04 BACK OFFICE

Cash, expenses and profit & loss, without the spreadsheet

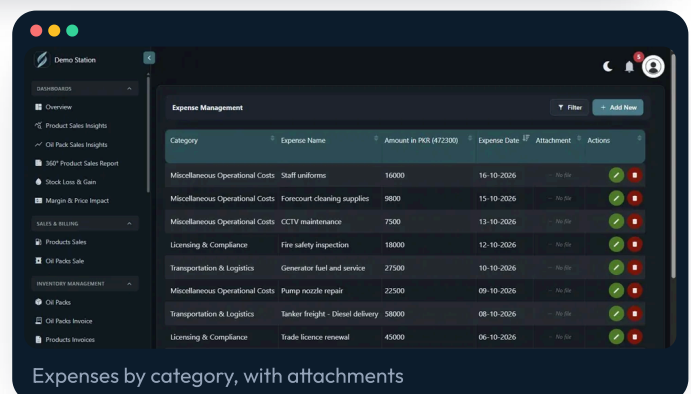

Every payment that comes in or goes out is recorded once, and your monthly profit & loss is built from it.

Monthly profit & loss with product-wise breakdown

Daily cash flow: cash, bank transfer, card and deposits

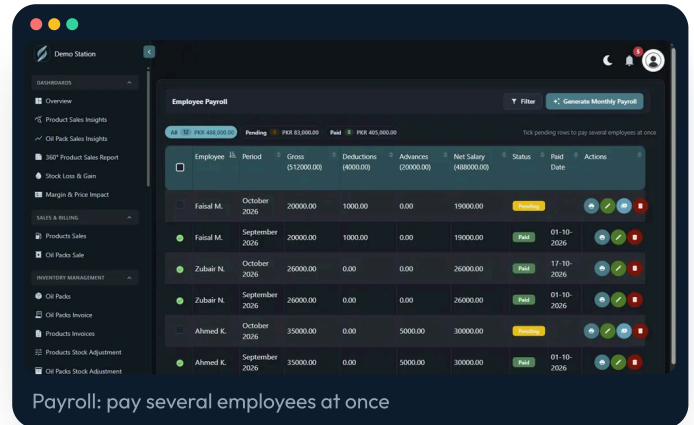

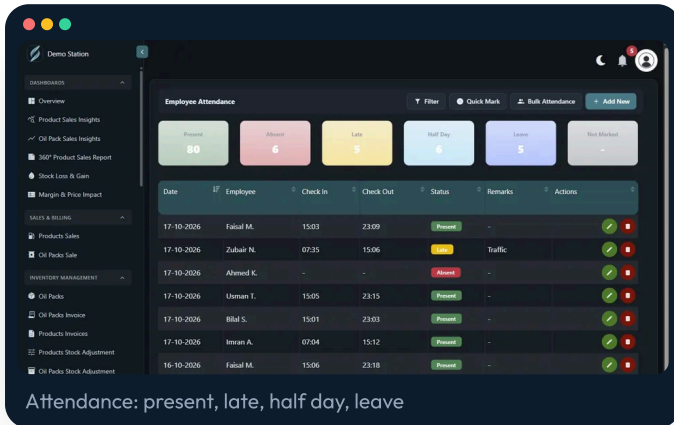

Expenses by category, with attachments

- ✓ **Expenses** by category, with receipts attached and analytics
- ✓ **Cash flow** by day: cash received, bank, card and deposits
- ✓ **Customers** with credit sales and running balances
- ✓ **Suppliers** with invoices, payments and balances
- ✓ **Monthly profit & loss:** revenue, cost of goods sold, expenses, net profit
- ✓ **Print or export** to Excel for your accountant

05 PEOPLE

Staff, attendance and payroll

Keep employee records, mark attendance in seconds and run monthly payroll with advances and deductions taken off automatically.

- ✓ **Employee records** with salary, role and documents
- ✓ **Attendance** one by one, in bulk, or with quick check-in
- ✓ **Salary advances** tracked and deducted from payroll
- ✓ **Monthly payroll** with payslips to print

06 CONTROL

Many stations, one secure account

Multi-station

Add stations under one owner and compare sales across sites.

Screen-by-screen permissions

Each user only sees the screens you allow.

Audit trail

Changes are recorded, so you know who did what.

Encrypted HTTPS

All traffic between you and FuelBotics is encrypted.

Your data, separate

Each business's data is kept apart from others.

Your currency

Each station can be set up with its own currency.

PRICING

Simple plans. Every feature included.

You only choose how many machine nozzles and users you need. Every plan starts with a 14-day free trial, and annual billing saves 20%.

Basic \$19 /month Up to 6 machine nozzles Up to 5 users Email support	MOST POPULAR Standard \$29 /month Up to 12 machine nozzles Up to 10 users Email and chat support	Premium \$39 /month Unlimited machine nozzles Up to 25 users Priority support	Customised Custom Limits and pricing for your network Help moving your data Onboarding and training
